K2600 Tire Lift

**HEAVY WHEELS.
EASIER HANDLING.**

Take the strain out of tire handling. The K2600 helps technicians lift and precisely position heavier SUV and light-truck wheels—making installation and removal safer, faster, and easier.

264 LB

MAXIMUM CAPACITY

0–50 IN.

LIFTING RANGE

6 SEC.

LIFTING SPEED

**BUILT FOR
PROFESSIONAL
TIRE SERVICE**

62-66147

01

Lift with less effort

Reduce the physical strain of handling heavy tire-and-wheel assemblies.

02

Position with precision

Bring the wheel to the working height for easier alignment and installation.

03

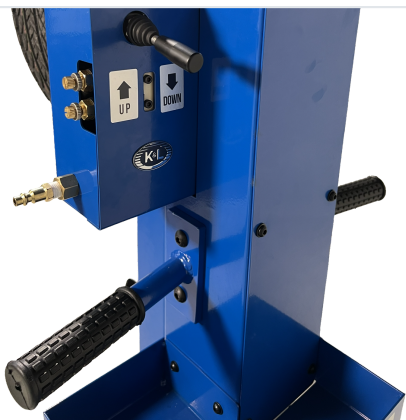

Improve shop ergonomics

Help technicians work more comfortably while servicing SUV and light-truck wheels.

04

Move where it's needed

A compact, mobile design makes the K2600 easy to position around the shop.

**CONVENIENT CONTROL.
ORGANIZED WORKSPACE.**

**PRECISE POSITIONING FOR HEAVY
WHEELS.**

Make demanding wheel service easier with the K&L K2600 Tire Lift. Engineered to lift and precisely position heavier SUV and light-truck wheels, it reduces the physical effort required during installation and removal while helping technicians work safely and efficiently. Its ergonomic, compact, and mobile design makes it a practical addition to any professional service shop—improving workflow, supporting technician productivity, and keeping heavy wheels under control throughout the job.

PROFESSIONAL WHEEL-HANDLING
SUPPORT

Tire Equipment & Tools

PRODUCT SHEET • SKU 62-66147

PRECISE POSITIONING FOR HEAVY WHEELS.

The K2600 precisely positions heavy SUV and light-truck wheels for safer, easier installation and removal.

PRODUCT SPECIFICATIONS

Maximum capacity	264 lb
Lifting Range	0 - 50 in.
Lifting Speed	6 seconds
Lowering Speed	5 seconds
Fork Length	17.5 in.
Fork Width	22.05 in.
Weight	154 lb
Warranty	One year
SKU	62-66147

BUILT AROUND THE TECHNICIAN.

The K2600 combines fast vertical travel, precise wheel positioning, and mobile shop convenience. It brings heavy tire-and-wheel assemblies to the required working height, allowing technicians to focus on alignment instead of manual lifting.

EFFORTLESS LIFTING

Handles tire-and-wheel assemblies weighing up to 264 lb.

PRECISE POSITIONING

Helps align heavier wheels during installation and removal.

ERGONOMIC DESIGN

Reduces the bending and lifting associated with manual wheel handling.

COMPACT AND MOBILE

Moves easily around the service area without a dedicated bay.

DURABLE CONSTRUCTION

Built for the demands of professional shop use.

IDEAL FOR
SUV TIRE AND WHEEL SERVICE

IDEAL FOR
LIGHT-TRUCK TIRE AND WHEEL SERVICE

IDEAL FOR
WHEEL INSTALLATION AND REMOVAL

Give Technicians a Faster, Easier Way to Handle Heavy Wheels.
