01

SUPPORT LARGER OUTBOARDS

Heavy-duty construction supports large outboard engines, including modern V8-class applications.

02

ADJUST THE WORKING HEIGHT

Position the engine at a more practical height for service, inspection, and testing.

03

SERVICE AND TEST

Use one stand for engine mounting, service, inspection, testing, and workshop handling.

04

ACCESS FROM BELOW

The open lower frame provides valuable clearance beneath the engine for service equipment and test procedures.

ADJUSTABLE WORKING HEIGHT

Position large outboard engines at a practical level for service, inspection, and testing.

OPEN LOWER FRAME

Provides space for test tanks, drain pans, lower-unit access, diagnostic equipment, and other service needs.

Designed for demanding dealership and marine-service environments, the K&L Supply V8+ Adjustable Marine Engine Stand provides the strength and flexibility needed to support, position, service, and test large outboard engines.

Its adjustable-height design improves technician access, while the wide-open lower structure leaves valuable working space beneath the engine. Unlike stands designed primarily for storage or transportation, the V8+ supports hands-on service and engine-testing workflows within one heavy-duty platform.

SUPPORT BIGGER ENGINES. DO MORE WITH ONE STAND.
