

NOLOGY PROFIRE IGNITION COILS

High performance ignition coils that offer the lowest inductance for trouble free high RPM operation and the fastest rise and discharge time. The provided spark is in excess of 45,000 volts over the entire RPM range. Profire coils are black with single or dual high tension towers. Coil connectors and boots included. Available in 0.3 ohm, 0.6 ohm and 3.0 ohm. Sold each.

20-8425 Single lead	0.3 ohms	20-8411 Single lead	3.0 ohms
20-8409 Single lead	0.6 ohms	20-8415 Dual lead	3.0 ohms
20-8412 Dual lead	0.6 ohms		

Note: DO NOT use **NOLOGY** Coils on point type ignitions or on the following motorcycles: Honda VFR, CB, CBX; Kawasaki ZX10, GPz, KZ1000J, Z1; Suzuki GSX-R (early oil cooled), GS; Yamaha-FJ, V-Max.

K&L CHARGE (SOURCE) COIL for ATV & OFFROAD

Sold each. *Made in Italy.*
Available for the following applications:

YAMAHA ATV		
YFM80N/S/T/U Moto-4	85-88	20-3523
YFS200U-SV Blaster	88-06	20-3523

K&L HONDA ATV PULSER COIL

OEM replacement. Sold each.
Made in Japan.

NOLOGY HOT WIRES

Nology Hot Wires store coil energy until it can be released as an ultra-short, ultra-hot spark. Expect better horsepower and torque (2% to 5%), no fouled plugs, less backfires and a better starting engine. Each kit includes a 30" Hot Wire with grounding strap, 90 degree or straight spark plug cap, in-line wire connector and heat shrink tubing. Order one kit per cylinder.

COIL CAP CONNECTOR REPAIR KIT

Are the coil connectors on your motorcycle broken or simply wont stay clipped to the coil? This handy kit includes the terminals and connectors necessary to repair a set of 4 damaged coil connectors. Kit also works on ATV and Watercraft models with stick coils.

20-8430 Coil Cap Connector Repair Kit
Kit contains: connectors (4), Terminals (10) and Terminal seals (10) Replacement sold in
34-0286 FWY-2F-B 2 Pin Female Coupler (pk/10)
34-9296 FRS-102 Terminal pin, Female (pk/50)
34-9297 FRS-103 Pin Seal (Black) (pk/50)

ACCEL SUPER COILS

20-6702, 20-6703

20-6701

Super Coils feature extremely high output, with racetrack proven performance on all motorcycles. Sold in single and two coil kits.

20-6701 Accel (140403-S) Single coil for Inductive Ignition (3.0 ohms)
20-6702 Accel (140403) 4 cyl. Kit for Inductive Ignition (3.0 ohms)
20-6703 Accel (140404) 4 cyl. Kit for CDI Ignition (1.2 ohms)

Note: Using the wrong coil may damage your ignition module.
To determine ignition type, perform the following test:

- 1) Using a voltmeter or 12 volt test light, hook positive lead to positive post and negative to ground on one of the stock coils.
- 2) Turn on the ignition but do not engage the starter motor.
- 3) If there are 12 volts at the coil, the motorcycle has inductive type ignition. If there is no voltage at the coil, then the motorcycle has a capacitive discharge ignition (CDI) because the power goes to the control box first.
